

Basic Plan for the Adjustable Table Top Fence

Adjust to material availability and your own specific needs.

Item	Description	Size	Material	Quantity
A	Fence Sides	6.5" x 6.5" x 1/2"	MDF or Plywood	2
B	Fence Back	X" x 4" x 1/2"	MDF or Plywood	1

Mitre Track (3ft)	2
1" x 5/16" Track Bolts	2
5/16" Knobs	2

Notes:

- The size "X" for the part B is determined by the width of you table top and then add 2 times the width of the wood you are using for parts A.
Example: for 1/2" thick wood add the table top width and 1" to get the length of the part B.
- Suggestion for cutting the track bolt slot:
 - 1) Use a router with a spiral cut bit to do the cutting.
 - 2) Drill a 3/8" Hole in the end of the slot.
 - 3) Place the side on top of the router bit with the bit in the hole.
 - 4) Use the reference point as a pivot point to cut the slot.
