Section 3 — TPJ Culminating Rubric

Criteria <i>Description</i>	I <i>Inc.</i>	R <i>Remedial</i>	Level 1 <i>Beginner</i>	Level 2 <i>Apprentice</i>	Level 3 <i>First Responder</i>	Level 4 <i>Paramedic / Nurse</i>
scene size-up assessment of the scene and surroundings	missing more than 4 steps	missing 3-4 steps	missing 2-3 steps	missing 1-2 steps	complied with	complied with and expanded upon
initial assessment quickly determine the nature of the illness or the mechanism of injury. AVPU	not done	not done properly or too uncertain AVPU – not done or incomplete	done, but with too much uncertainty AVPU – poor	done, but with a little uncertainty AVPU – weak	done competently and thoroughly with minimal reflective thought AVPU – well done	done competently and thoroughly with ease AVPU – excellent
treatment FA CPR O ₂ AED suction	inc. inc. inc. inc.	FA too poor CPR too poor O ₂ too poor AED too poor	FA done weakly CPR done weakly O ₂ done weakly AED done weakly	FA done moderately CPR done moderately O ₂ done moderately AED done moderately	FA done competently CPR done competently O ₂ done competently AED done competently	FA very competently CPR very competently O ₂ very competently AED very competently
focused history medical history chief complaint OPQRST associated symptoms summarize	missing more than 3 steps	missing 2-3 steps and/or unprofessional	missing 2 steps and/or somewhat unprofessional	missing 1 step and/or demeanor not professional enough	complied with and done well	professionally complied with and expanded upon
physical examination head neck chest abdomen pelvis extremities posterior aspect of the body obtain baseline vital signs	missing more than 4 steps	missing 3-4 steps and/or unprofessional	missing 2-3 steps and/or somewhat unprofessional	missing 1-2 steps and/or demeanor not professional enough	professionally performed	professionally performed and expanded upon
detailed physical examination secondary survey	missing more than 4 steps	missing 3-4 steps and/or unprofessional	missing 2-3 steps and/or somewhat unprofessional	missing 1-2 steps and/or demeanor not professional enough	professionally performed	professionally performed and expanded upon
ongoing assessment stable - every 15 minutes unstable - every 5 minutes	missing more than 4 steps	missing 3-4 steps and/or unprofessional	missing 2-3 steps and/or somewhat unprofessional	missing 1-2 steps and/or demeanor not professional enough	professionally performed	professionally performed and expanded upon
documentation proper documentation is necessary for defense if patient care ever needs justification in a hearing or negligence suit	missing more than 4 steps	missing 3-4 steps	missing 2-3 steps	missing 1-2 steps	complied with	complied with and expanded upon
body substance isolation infection control approach	not done	BSI not complied with	BSI protocols are complied with and PPE disposal is poor	BSI protocols are complied with and PPE disposal is weak	BSI protocols are complied with and PPE disposal is good	BSI protocols are complied with and disposal of PPE is done extremely well
ropes & knots properly dressed; loops and bights are proper size	inc.	poorly done	knot is correctly tied; not dressed properly; loops and bights are not proper size or dimension; knot was tied with difficulty	knot is basically correct but is not of perfect form (e.g., dressing or tie off knot is not performed properly); knot is resembled but not identical	knot is dressed properly; loops and bights are proper size and dimension; correctly tied off when necessary; tied with some ease, confidence and effort	perfect form, dressed properly; loops and bights proper size and dimension; correctly tied off when necessary; tied with ease, confidence and little effort
extrication removal of a casualty from a hazardous environment (e.g., MVA) c-spine KED c-collar	no stabilization, prof., or care	too unstable; unprofessional and/or rough	stabilization is poor; not professional or careful enough	stabilization is weak; could be more professional and/or careful	stabilization is good; casualty removed in a professional and careful manner	stabilization is excellent; casualty removed in a professional, careful, and timely manner
circulatory system heart blood lungs deoxygenated oxygenated nomenclature	inc.	too vague or missing too much information	explanation is poor and not in the vernacular	explanation is lacking in detail and/or vernacular	explained well and used mostly correct vernacular	explained thoroughly and used germane vernacular
heart control system heart SA AV diastole systole pace maker His bundle branch purkinje	inc.	too vague or missing too much information	explanation is poor and not in the vernacular	explanation is lacking in detail and/or vernacular	explained well and used mostly correct vernacular	explained thoroughly and used germane vernacular
